

# Siljan AIR PARK

## NEWSLETTER

Nº 2/2010

This is the time of year for closing down and enjoying the abundant autumn harvest. Did you know that *Cantharellus tubaeformis* can be found in the woods around the airpark and that it is a delicious mushroom? Fry it with butter, salt, and a nip of garlic. Yumm!!

Only don't confuse it with *Cortinarius rubellus*, which is one of the most poisonous mushrooms in Sweden and also found in our forests around the airpark!

Beware of the poisonous spindling!!  
†††

But - as the elk-hunting season has begun this Monday and the

temperature hit minus degrees last night it might be advisable to wait until next fall.

### Wood, concrete and frigitite news

It is nice to look back and once more enjoy the memories of the activity of the past summer. It is not possible to place all the illustrative photos from building activities in the newsletter. You may want to visit the media gallery and watch the pictures of all the ingenious solutions. But one or two stands out. One that was extraordinary for Siljan AirPark was the arrival of Anna and Martin Eronn's little house! As it shows on the picture above it FLEW in! Appropriate, I'd say.

- and here is Viktor Eronn, apparently in awe facing Daddy's weird way of house building. "How do I get up there??"

Concrete on hangar grounds. Modern building technology - where were we without?

### Road news

We all have received a cute bill from Lantmäteriet, so now we are the proud, legal and happy owners of Björken:8, i.e. our airpark and the runway. But not only that, we are the legal owners of Vindmyrevägen as well. Concerning happiness on this matter it is so far a bit half-hearted because now we also "own" the obligation of bringing the road up to a decent standard and maintain it that way. We all know that this will cost, and it is a comfort that our board and Carl Rönn are working hard on a sensible solution that hopefully will include at least a contribution from Leksand commune.

### Wings and prop news

A yellow Glasair SE-XXS arrived in august and moved into a hangar on Rodervägen as a new member of the Hanson-family. A few weeks later a white and blue Rally parked in front of a future hangar also on Rodervägen. A certain short-legged, tail-wagging, and friendly barking Vincent is said to be a very content occupant of the back seats of SE-IMX

T(p)ax Vincent

On [www.homebuilderscorner.dk](http://www.homebuilderscorner.dk) you may follow the progress in the building of a RV6, OY-RVG, which may visit Rollvägen 19 in Siljan AirPark some day in the future.

### New member in SAPS

As you may have noticed the following had unfortunately fallen out of the pdf version of Newsletter 1/2010:

"Robert S and family from Germany, are now the happy owners of Rodervägen 8 and 10. They are warmly welcomed, and we hope they too will experience Siljan AirPark as the answer to their living-with-your-plane-dreams." The editor apologizes for this miss 😊

### Club news.

Tiling in Reningsvärket is put on hold.

### Siljansnäs.

A recent survey reveals that people in Leksand are considered the nicest people in Dalarna. Siljansnäs and Siljan AirPark are both part of Leksand commune so your editor takes it for granted that we in Siljan AirPark count as well as the nicest people in Dalarna

The Library in Siljansnäs situated in Siljansnäs Public School (close to Tempo) is temporarily closed due to damage from damp.

**Fleamarket** in Sockenstugan in Siljansnäs on **Sunday October 17th**

<http://www.siljansnas.w.se/sites/default/files/HÖSTLOPPIS.pdf>

**October 31<sup>st</sup>** folk music in Sockenstugan, Olav Johansson & Catrine McKay - Alm Nils Ersson & Kungs Levi Nilsson. High standard!

### From the big world.

Another very small airpark has entered the index on Airpark Living, and they even managed to mow the name of the airpark Zangger in the grass beside the strip. What an idea! Maybe somebody should inspire the farmer, who is cultivating the area between the safety zone and X-ray in Siljan AirPark ???

<http://www.zanggervintageairpark.com/>

Problems we do not have in Siljan AirPark: How do you protect the airspace around your airpark? The answer to this could be a challenge to our coming Airfield Safety Group.

<http://livingwithyourplane.com/2010/09/16/three-questions-from-texas-reader/#more-1307>

But what we do share with other airparks is the two-sided problem of deer on the runway. We all enjoy watching the beautiful and majestic animals, and we all face the risk of a too close encounter on the runway during landing.

<http://www2.tbo.com/video/2010/sep/22/deers-causing-airport-safety-concerns--88787/video-news/>

A green airport? Would that be an object for Siljan AirPark? Doing something more for the environment?

<http://www.airportimprovement.com/>

After some years of permanent residency in Siljan AirPark you may want a summer place under warmer latitudes, check this

[www.phuketflying.com](http://www.phuketflying.com) , one Bath is right now 0.22 SEK.
